COMPANY

Vikmanshyttan located in Sweden, is considered as a centre of excellence for cold rolling of high-speed steel strips- Erasteel offers a great range of strip sizes, a multitude of finishing and packaging options, and world class know-how.

PRODUCTION MEANS

At Erasteel we control the complete production flow from atomization or melting of the steel, through forging and hot rolling, to cold rolling of the finished strip in Vikmanshyttan. This gives us great flexibility in meeting our customers demands.

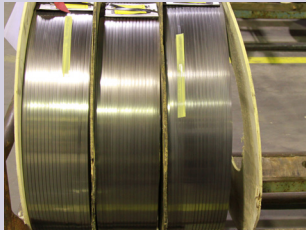

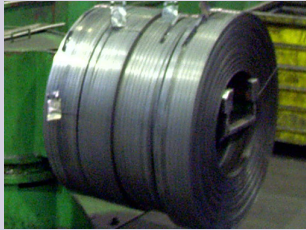

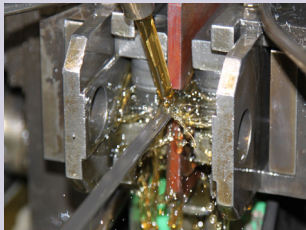

In house:

- Edge shaving
- Heat treatment
- Rolling
- Nondestructive testing
