Packaging

- Metallic drums: 250 Kg
- Barrels
- Big bags
- Customer packaging on request

Features and benefits

- Standard & customized compositions
- Particle size up to 500 µm (35 Mesh)
- High powder flowability
- Best packing density
- Flexible service

POWDER GAS ATOMIZATION PROCESS

Made in Sweden

➤ A state-of-the art gas-atomization process:

- Melting with ESH technology
- Gas atomization with Nitrogen
- Highly spherical powder morphology
- High stability and reproducibility
- High cleanliness level
- Fully controlled low oxygen and carbon levels
- Avoids satellites & internal porosities

More than 50 years of experience
on powder gas atomization
at Söderfors, Sweden

APPLICATIONS

- Mechanical components, injection screws and segments
- Tooling
- PM-HSS cutting tools
